Canterbury, 13th March, 7pm

DR. LOUISE NAYLOR: DESIGNER BABIES: FACT OR FICTION?

Planning parenthood? Don't leave it to chance. Let our experts help you create that special baby to order.....

With more than a million babies born through IVF and other assisted conception techniques, explore the facts and the fiction behind the headlines. As reproductive medicine continues to push back the boundaries of parenthood, debate the extent to which we can or should manipulate human life in this way. Come and hear about the recent scientific advances in this area (from conception to cloning) and discuss the ethical implications for mankind.

Dr. Naylor is lecturer in the Department of Biosciences and head of the UELT, University of Kent

What is Café Scientifique?

Café Scientifique is a place where, for the price of a cup of coffee or a glass of wine, anyone can come to explore the latest ideas in science and technology. Meetings take place in cafés, bars, restaurants and even theatres, but always outside a traditional academic context.
