
City College Norwich

ASSIGNMENT BRIEF

You are required to plan and deliver a presentation on your application and HTTP web servers.

Your presentation should include:

1. How to install your application with an Apache server:
 - How to migrate your application to a new Apache server (on an operating system of your choice)
 - Which files and folders are significant to administrating the server

2. A web technology that would improve your application
 - A selection of a current technology, such as: AJAX, Semantic Web, Web services, component frameworks, Web mashups, social Web sites;
 - A presentation of that technology;
 - A description of how it would apply to your application, and why.
