

Script for between the end of computer test (phase 1) and before the questionnaire is handed out

[The end of the first section of the computer test will be showing on the screen]

[Hand out questionnaire and pen to participant]

You may now check the box and proceed to the next stage. **[So that the first map is displaying]**

In the next stage of the test, you will be shown three different maps in turn, each of which has a modification and three methods of redrawing it. To the right of each map, there will be three buttons that can be pressed to show each of the three possible redrawing methods.

Use these buttons to view the redraw methods and answer the questionnaire.
